

Methamphetamine Project - \$500

DUE April 1, 2018

Purpose: Methamphetamine use has been identified as an increasing problem in Wisconsin communities and counties, with personal, domestic, social, financial, legal and environmental consequences and burden. The purpose of the Methamphetamine Project is to develop an Action Plan by which coalitions can identify root causes and local conditions that foster methamphetamine use, identify strategies for effective community change, and provide related educational opportunities. This can include implementing a mock display such as a bedroom, locker, or backpack.

Coalitions that successfully participate in the Methamphetamine Project are eligible for a **\$500** incentive to offset the cost of staff time for coordinating logistics, implementing the action plan, printing/copying or other expenditure as deemed appropriate by the coalition. Multiple coalitions within a county are encouraged to work together and each is eligible for a \$500 incentive, although each must apply for the project.

Coalitions that participate must:

- Apply to participate by September 15, 2017.
- Communicate with Marshfield Clinic staff as needed on the Methamphetamine Project.
- Include recognition of Northwoods Coalition on printed materials, etc.
- Submit a Prevention Action Plan to address methamphetamine use in the community.
- Submit local meeting minutes and project Invoice no later than April 1, 2018.
